The diagram shows a vertical book spine on the right side of the page. Two rectangular tabs extend from the spine towards the left. The top tab contains the text 'JSX Components' and the bottom tab contains the text 'React-redux'. Both tabs have a small icon on their left edge, resembling a binder clip or a staple.

The diagram illustrates a layered application architecture. It features three stacked rectangular boxes on the left, each with a small icon on its top-left corner. The top box is labeled 'Application Methods', the middle 'Route Handler', and the bottom 'Express Middlewares'. These boxes are set against a light gray background. To the right of these boxes is a vertical gray bar with a 3D effect. At the bottom, there are two white rectangular blocks with rounded corners, separated by a gap, which appear to be part of a base or foundation.
